### Questions about your health?

Download the Medicoo app and ask anything you need using the chat function.

You'll receive personal suggestions from a medical team quickly and easily. It's great for when you have questions or concerns about your health.

You can also send photographs via chat. If necessary, we can then refer you to a doctor, who will receive the referral directly from us.

Our medical team is ready to help you via chat or online video consultation. Monday to Friday from 8am to 5pm.

In potentially life-threatening situations, you should call 112 and not use Medicoo.

**Download the Medicoo app, register and ask your question!**
